

*Two Images of a Four-Lens Photograph*

Meserve collection O-75A

Missing view B

Missing view c

Library of Congress O-75D

PUBLISHED TOGETHER for the first time, these two images from a four-lens photograph show that Lincoln appears taller from the angle of the lower lens. The A negative was originally discarded because of a defect and was not published until February, 1939, at which time it was in the collection of William Randolph Hearst.
